PROJECTS

Project Name	Purpose	Time Period
• MarketingCover.com	A content publishing website which was made with WordPress on new tech gadgets and reviews crafted around them	2013 – 2014
• WhatSoBig.com	A web-blog which writes on mysteries and interesting facts	2013 – 2014
• TechPreface.com	Website which was created to write on trending news from the tech world	2014 – 2015
• StickWithSEO.com	A website which was made with PHP and MySQL to track any website's SEO score by using an algorithm	2015 – 2018
• NextDroneTech.com	WordPress website which covers more of the new drone news around	2017 – 2018
• InternetCuriosity.com	A mobile phone comparison website	2017 – 2018
• Vieww.Me	A React.js web application which is created for anyone on the web to easily create their online profile portfolio and customize for free	Since 2018 (Active)

The projects listed above are either co-founded or founded by myself; and skills above are thought by myself by experimenting on building these applications, websites and various other which are not listed here. These are the web applications or blogs which I've handpicked from hundreds of sites which I've used to learn from to create them.

These websites were all active during the years mentioned. The final project (Vieww.Me) is a one page web application which is built with tons of powerful trending tools as of 2019.
